

Installing R and RStudio

John O'Sullivan

Step 1. Install R:

In order to install R work through the following commands:

1. go to <https://cran.rstudio.com/>
2. depending on your operating system:
 - click Download R for Linux
 - Then choose your Linux distribution and follow the instructions given on the website
 - click Download R for (Mac) OS X
 - click on the most recent package (R-4.0.3.pkg is the most recent release at the time of writing (January 2021))
 - click Download R for Windows
 - click on base
 - click on Download R 4.0.3 for Windows (or the most recent release available)
3. choose default answers for all questions

Step 2. Install RStudio

We will be using an IDE for R called RStudio - more info on the RStudio website: www.rstudio.com

In order to install RStudio, work through the following steps:

1. go to <http://www.rstudio.com/>
2. click [Products - RStudio](#)
3. click [RStudio Desktop](#)
4. click [Download RStudio Desktop](#)
5. click [Download](#) under [RStudio Desktop Open Source License FREE](#)
6. choose the installer for your system
7. choose default answers for all questions
